

WHY WILL YE DIE?

GREAT WORK AND GREAT SUCCESS

Vital Magnetism Cures When All Else Fails.

Should any one doubt the really wonderful cures now being wrought in our midst they need only have a visit to the greatest of all living Magnetists, Dr. Damon, at 609 12th street northwest, and listen to the reports made of remarkable cures by the people who have seen him. Seated in the large parlors yesterday were many who had come long distances to see this famous man. Among them were invalids, merchants, and farmers. One reverend gentleman had come from Illinois, to tell how his wife had been cured, and how he, after trying over a dozen physicians of his own town, as well as in Chicago, without any benefit, came here and placed himself under this treatment that has made for Dr. Damon a reputation that will last for ever. He said he was now well, and returned to his home in western Iowa. Another told of his wife's cure of rheumatism. He had spent over \$1,000 with other physicians without relief, but she has been cured and is now able to do all the work of a man. A third man, who had been afflicted with rheumatism for over twenty years, and who had been treated by a host of doctors in all parts of the world, and who had spent over \$10,000, and who had been told by all his associates that he was incurable, came here for treatment. The large reception and treatment room, together with the laboratory, was well fitted and furnished, both for the convenience of the patient as well as patient.

SPECIAL SHOE OFFERINGS

For a few days only, viz:

1st Men's \$2.75 Shoes for \$1 per pair.

2nd Men's \$3.50 Russia Calf for \$2.50.

Several Ladies Men's \$3 French Patent Calf Shoes, hand sewed, at \$3.75 per pair.

Facts About Industry.

The Chinese claim to have possessed the art of enameling metal from at least 3,000 B. C.

The manufacture of artificial flowers began in Italy in the early years of the eighteenth century.

The horseshoeing smith first appeared in Germany, where iron shoes were first used for horses.

The first famous German brewer was Herr Kaustner, who wrote a handbook on his art in 1576.

The first hat makers who plied their trade in Spain were Spaniards, who came to that country in 1510.

Gunpowder was first employed in blasting in the Harz mountains about 1120, and was denounced by the clergy as sorcery.

The first biblical mention of brickmaking is in Genesis. The chronologist places the date of this reference at B. C. 2347.

According to Homer, clothing in his time was washed by being placed in water and stamped until it was supposed to be clean.

The first glass windows in western Europe were made by a Greek in 548 for a church built by the Frank King Childobert.

Soap is first mentioned in the ninth century. It was alluded to as in use in Germany for cleaning clothing and as an excellent medicine.

At the Railroad Station.

Traveler—A ticket to Tokyo, please.

Booking clerk—Very sorry, there is no train, the line is snowed up.

Traveler—What? That let me have a half penny, please, that I may inform my wife. Fluecigne Blatter.

The Valise of Damocles

[Adapted from the French.]

After the regatta at Evian, the Marquis and Marquise de Reinepont intended to stay at Leman until the opening of the shooting season on the twenty-third of August. But the torrid heat of the Savoyard coast made them give up their project, and they were compelled to find some other employment for the intervening ten or twelve days.

The question was discussed in a conjugal council, and, as often happens in particularly united families, each came to an independent determination without disturbing the harmony that existed between them. It was decided that the marquis should go to Dieppe, whence he could easily reach his chateau de la Pointe in time to receive the five or six friends he had invited for the shooting.

The marquis, on the other hand, escorted by his faithful Justine, should refresh himself with a little journey in the Alps. Ah, what estate delight it would be to shiver in the middle of August, to melt in the palm of her hand the snow gathered from the roadside at the top of some mountain, sweep by the winds from the neighboring glaciers! What a new and untried pleasure it would be to travel, wherever fancy led her, unhampered by trunks of toiles, among people who were not continually meeting in Paris from one end of the year to the other, and no ubiquitous reporter sending her name to his paper as "among the notable arrivals!"

"But where will you go?"

"I know that there would not be any fun in it. No matter where, so long as it is a place where I shall not see a single Parisian and where it will be very cold."

"Suppose the marquis should go to you?"

"What then? Shepherds, chamois-hunters, or Scotch parsons? No; in the first place, I shall be frightfully ugly. I shall wear a hat like an English woman's, boots like a Ger-

The Spirit of Hospitality.

To know how to entertain is one of the fine arts of life, and one which by the way, is not as common as it is supposed to be. The manager within our gates has a very comprehensive claim upon us. Those whom we invite are, as a rule, people for whom we have considerable regard, and this should be exhibited in the over thoughtful effort to make them as comfortable as possible, and to studiously avoid whatever will make ripples and ruffles on the surface of daily events.

One of the most artistic of hostesses declares that her guests are, for the time, the sovereigns of the situation, that everything is subordinate to their pleasure and entertainment.

Occasionally she finds guests that fully respond to her spirit, and then the season is a perpetual delight. Sometimes the guests are thoughtless, careless, indifferent, and not at all in harmony with the spirit that rules the house. Then a compromise with circumstances is necessary, and the visit is given over to the guests, with the understanding that the invitation is not always repeated; for, as she argues, it is not worth while to devote one's time and energy to the entertainment of the guests who do not appreciate the courtesies they receive.

The proper way to entertain and to be entertained should be a part of the education of every child. The guests should be treated as guests, and not as a means to an end.

Children should be instructed in their treatment of guests, for the sake of hospitality, or should be blinding upon all persons. If you invite a guest, entertain him personally. If he is not appreciative, make him happy with a few words, but do not invite him the second time.

There are many people who wonder why they never receive the second invitation to certain houses. The answer is, they do not. The fellow guests have any doubts as to the reason why. They have not made themselves sufficiently agreeable to be welcomed on future occasions.

Visiting, especially in a country house, is something that must be managed as a fine art in order to be at all successful. One is either very happy and comfortable or very much the other way.

There are two delightful things that a season at such a place when everything is right, but we believe those who chance to strike an indifferently selected company or one that contains a single person of the inexperienced guest.

Cracks in Bread Loaves.

The cracks in loaves are caused usually by too much yeast being used in the bread, making the loaf too light. When the latter is set at night sufficient flour is added to make it pour thickly from a spoon. In the morning, when kneading, only enough flour should be added to keep the dough from sticking to the hands and the board, and practice in kneading until the dough is as firm as the first trial. Bread should be turned in the oven while baking, so that all sides may be baked equally, or at least to an equal heat, as this sometimes makes the cracks.

Loved Housekeeping.

Mrs. George Washington, although an heiress and a beauty, and for many years the lady of the land, never disdained the homely, honorable duty of housekeeping. She considered it a great privilege to look after the details of her household, and regarded the "state days" as lost. In her home at Mount Vernon, as in all large southern mansions, a woman, who was not a housewife, was not a mistress. Mrs. Washington could be found, surrounded by many of her servants, superintending and assisting in their work.

When a Cold is Coming On.

Frequent sneezing and chilly sensations are signs of a coming cold. Sometimes it can be broken quite effectively by a little lemonade. Get the lemon and sugar ready and set the water boiling. Then bathe the head and neck with the water, and have a glass of lemonade. Retire immediately, and have brought the lemon and sugar, over which the boiling water has been poured. Drink it down as fast as possible.

The Care of Disinfectors.

When one is done using disinfectants they should be thrown into a dish of water, a little soda or potash put in, and placed for a short time in a stove, allowing the water to boil. When the water is hot, the disinfectant should be placed in cold water and hung up in the air. When needed again they will be as clean as when first used. The disinfectant should be used in the laundry, in which condition they may be kept.

A Thought for Parents.

Each one of us is bound to make the little circle in which he lives better and happier. Each of us is bound to see that out of that small circle the widest good may flow, says Dean Stanley. Each of us may have fixed in his heart the desire to make his little household a better place, and his own life a more useful one. Let us strive to do this, and the whole civilized world will be the better for it.

Never Resigned Himself.

Minister—So you don't think I practice what I teach, do you?

Deacon—Well, considering that you have been preaching on the subject of resignation for the past thirty-seven years, I don't quite think you do.—Truth.

He was Certain to Return.

Head of firm—I don't believe that buyer will ever come back here again. He will.

Salesman (confidently)—Yes, he will. Head of firm—What makes you think so?

Salesman—I borrowed \$5 from him.—Clock Review.

A Lincoln Death-Mask.

"After reading your interesting descriptions of relics of Abraham Lincoln, I feel impelled to describe one in my possession," writes Dr. W. B. Clarke, of Indianapolis, to Kate Field.

"It is a plaster cast of the head and neck of Mr. Lincoln, in full side view, the whole oval being twenty-five by twenty-one inches and the head and neck twenty inches long. The great point of interest about this

AMONG TEMPERANCE WORKERS.

Large and Interested Attendance at the Quarterly Meeting of the W. C. T. U.

The quarterly meeting of the Women's Christian Temperance Union was held yesterday at the Vermont avenue Christian church. This meeting was of unusual interest, and lasted from 10 until 4 o'clock, with an interruption for an inviting luncheon. There were present a much larger number than usually attend the annual meetings. Mrs. Mary C. Griffith, the president of the society, presided.

An address of welcome was made by Rev. W. H. Schell, who extended a most hearty invitation to the guests. The address was given by Mrs. M. S. Hartsock, of Ryland chapel. Rev. Mr. Vawter, Rev. Mr. Matchett, Rev. Mr. Johnson, of the Lincoln Memorial, Rev. Mr. M. H. Braden, Rev. Mr. G. H. Gunton Memorial, and Hon. Hiram Price spoke upon the subject of prohibition and their excellent work. Mrs. Anna Rice, of the Lucy Webb Hayes Bible Society, of Batavia, N. Y., also gave an interesting temperance talk.

Reports from the various committees were read and adopted, and a show of a remarkable increase in the amount and beneficial results of the work of the respective friends. The union is endeavoring to influence the churches not to serve fermented wine at communions. The treasurer's report showed the receipts to be \$457.71, the expenses \$445.93, leaving a balance on hand of \$38.78.

Mrs. F. M. Bradley addressed the meeting upon the necessity of building a permanent home for the union. She said that the union is now in need of a permanent home, and that the friends of the union should endeavor to secure one. She said that the union is now in need of a permanent home, and that the friends of the union should endeavor to secure one.

The following committees were appointed: On resolutions, Mrs. George W. Gray, Mrs. Hartsock, and Mrs. Falconer; on credentials, Mrs. A. Williams and Miss Lizzie Kessler; on the report of the committee on the receiving new members, Mrs. M. E. Cohen.

A resolution was submitted and adopted concerning the death of Senator Colquhoun as follows: "Resolved, That we deplore his loss to the United States Congress as well, since never in the history of the nation were passed unadvised resolutions, and that we deplore his loss to the United States Congress as well, since never in the history of the nation were passed unadvised resolutions."

Resolved, further, That a copy of these resolutions be furnished to the bereaved family and the daily papers for publication.

Biddy Lays Black Eggs.

(From the Baltimore American.)

A chicken, that lays black eggs, is the property of Mr. and Mrs. Charles H. Barton of 6 Brunswick street. More remarkable is the fact that the fowl began the singular feat on the eve of Easter, when dyed eggs are so popular, especially with the young folks.

The chicken, which is a very fine specimen of the breed, has been laying black eggs for some time. The eggs are of a deep black color, and are of a fine shape. The chicken is a very fine specimen of the breed, and is a very fine specimen of the breed.

The chicken is a very fine specimen of the breed, and is a very fine specimen of the breed. The chicken is a very fine specimen of the breed, and is a very fine specimen of the breed.

The chicken is a very fine specimen of the breed, and is a very fine specimen of the breed. The chicken is a very fine specimen of the breed, and is a very fine specimen of the breed.

The chicken is a very fine specimen of the breed, and is a very fine specimen of the breed. The chicken is a very fine specimen of the breed, and is a very fine specimen of the breed.
